DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Lowrey
US 6,576,921.

Lowery discloses a memory structure including a transistor having a p-type base, n-type collector and n-type emitter, and a chalcogenide alloy phase change material in contact with the transistor and the structure can be SOI (see figs. 1-3 and related text).

Claims 9-20 are allowed over the prior art.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
